MHYCO LORENCE A. SUELLO

Full-Stack Web & Mobile Developer | Systems Analyst | IT Support

Parañaque City, Metro Manila | 0961 674 9147 |
mhycosuello@gmail.com | **portfolio-suello.vercel.app**

OBJECTIVE

Results-driven 4th-year BSIT student at National University – Mall of Asia specializing in full-stack web development (MERN Stack) and cross-platform mobile app engineering. Seeking a 400-hour IT Internship (OJT) position to apply systems analysis, REST API integration, and automated application testing capabilities within dynamic enterprise software development teams.

EDUCATION

NATIONAL UNIVERSITY – MALL OF ASIA CAMPUS **2023 – Present**

Degree: Bachelor of Science in Information Technology (Web & Mobile Specialization) | **Awards:** Consistent Dean's Lister (1st–4th Year)

Capstone Project: FLEETX – Smart Car Rental & Fleet Management System with Real-Time GPS Tracking

WORK & PROJECT EXPERIENCE

FLEETX – Smart Car Rental & Fleet Management System | *Lead Systems Analyst & Full-Stack Developer*

- Architected and engineered a multi-tier web and mobile rental application using React.js, React Native (Expo), Node.js, Express, and MongoDB for 20+ commercial fleet vehicles, securing a 5.80/6.00 Usability Rating during User Acceptance Testing (UAT) with 69 evaluators.
- Integrated client-server REST APIs, MongoDB spatial indices, and Cloudinary media upload pipelines with live Google Maps telemetry, achieving real-time GPS tracking accuracy and seamless document validation for customer verification.
- Executed end-to-end systems analysis, functional decomposition diagrams (FDD), and formal IEEE documentation across 5 user roles (Guest, Customer, Staff, Admin, Tech Admin), ensuring zero critical bugs during formal capstone deployment on Render.

Healthcare Clinic Management System (Web Portal & Mobile Prototype) | *Systems Analyst & Web/Mobile Developer*

- Developed a centralized MERN stack web portal for medical appointment scheduling, electronic health records (EHR), and patient intake workflows, eliminating scheduling conflicts through automated validation algorithms.
- Implemented JWT-based Role-Based Access Control (RBAC) and secure RESTful backend endpoints in Node.js/Express, guaranteeing 100% data privacy compliance across doctor and administrative staff roles while executing functional, unit, and regression test suites.
- Designed and prototyped a cross-platform mobile patient registration and booking app using Flutter and Dart with dynamic state management for real-time rescheduling, cancellations, and cross-device UI responsiveness.

TECHNICAL SKILLS

- **Full-Stack Web & Mobile:** React.js, React Native (Expo), Flutter/Dart, JavaScript, Node.js, Express.js, MongoDB, REST APIs, Tailwind CSS, HTML/CSS, Java, Python, Spring Boot
- **Systems Analysis & QA:** Requirements Mapping, Workflow Analysis, Functional & Regression Testing, Test Case Writing, Bug Tracking, IEEE Documentation
- **Tools & Deployment:** Git/GitHub, Postman, VS Code, Android Studio, Vercel, Render, Cloudinary, Figma
- **IT Infrastructure & Labs:** Virtual Machine Setup, OPNsense Firewalls, Windows Server, Active Directory (GPO), Cisco Packet Tracer (LAN/WAN, TCP/IP, DNS, DHCP), Hardware Troubleshooting

EXTRA-CURRICULAR ACTIVITIES & COMMUNITY INVOLVEMENT

- **Active Member – JPCS NU MOA Chapter:** Participated in campus tech seminars, peer workshops, and IT student development programs.
- **Community Volunteer – NU MOA COMEX / DSWD:** Assisted in community relief repacking operations and led media/technical documentation for a digital-footprint awareness campaign in Pasay City.

COURSES & CERTIFICATIONS

- **Cisco Networking Academy (June 2025):** Introduction to Packet Tracer, Getting Started with Packet Tracer, Exploring Networking, and Exploring IoT.
- **Simplilearn SkillUp (April 2025):** Certificate of Completion in Introduction to Computer Networking.
- **Kadakareer & Packetworx (April 2026):** IoT & LoRaWAN Workshop Series Certificate of Participation.
